VIKRAM SHARMA

DATA ENGINEER | ANALYTICS & BUSINESS INTELLIGENCE

linkedin.com/in/vikramsh27 | sharmavik279@gmail.com | +1 416-700-5194 | Toronto, ON

PROFESSIONAL SUMMARY: Data and analytics professional with 5+ years of experience building data pipelines, business intelligence solutions, automation, and decision support tools across cloud and relational database environments. Delivered a real-time AWS alerting service with sub-second latency and pricing analytics that supported ~$25M in FIFA World Cup revenue. Progressed from software engineering and reporting into end-to-end ownership of data engineering, pricing analytics, real-time integrations, and leadership decision support. AWS Certified Data Engineer - Associate.

TECHNICAL SKILLS

Data Engineering: SQL, T-SQL, Python, Spark, ETL/ELT, Data Pipelines, Data Modeling (Star Schema), Data Warehousing, Data Transformation, Data Validation, Data Profiling

Cloud & Integration: AWS S3, Lambda, DynamoDB, Redshift, CloudWatch, Azure Data Factory, Azure Databricks, Azure SQL Database, Blob Storage, REST APIs, Webhooks, Git

Analytics & BI: Power BI (DAX, Power Query), Excel, KPI Reporting, Dashboard Development, Data Visualization, Ad Hoc Analysis, Market Analytics, Pricing Analytics

Data Operations: Pipeline Monitoring, Production Support, Root-Cause Analysis, Data Quality, Workflow Automation (Selenium), Requirements Gathering, Stakeholder Management

EXPERIENCE

Data Engineer, Pricing & Market Analytics | Big Time Tickets Inc. | Windsor, ON — Mar 2022 – Sep 2026

($50M+ annual-revenue live-event ticket brokerage with a lean 7–8 person team.)

- Built the company's first end-to-end sales analytics platform, using Selenium to automate CSV extraction from a third-party portal and developing Power BI models covering sales velocity, ATPs, views, clicks, venue performance, and section-level demand to identify investment and inventory opportunities.
- Drove pricing decisions for $30M+ in annual inventory using marketplace APIs and real-time demand signals, sustaining 18–23% margins while revenue grew from $20–25M (2022) to $50M+ (2026).
- Integrated marketplace sales and listings APIs and, as data scaled to 200K+ active and 1M+ historical events, migrated storage and processing from a remote server to AWS for greater scalability and cost efficiency.
- Built a real-time invoice notification service using webhooks, AWS Lambda, DynamoDB, and CloudWatch, delivering Slack and Discord alerts in under 1 second from POS generation while handling duplicate events and marketplace-specific invoice formats.
- Supported FIFA World Cup pricing, purchasing, and ad-hoc analytics, informing inventory and investment decisions during a period that generated approximately $25M in FIFA-related revenue.
- Led data and integration changes during a POS migration, updating invoice workflows and sales/listing pipelines with less than one month of disruption.

Software Engineer I | MAQ Software | Hyderabad, India — Dec 2020 – Sep 2021

- Extended Spark-based ETL pipelines in SQL and Python to onboard newly introduced source tables for financial planning and analytics applications, optimizing transformations to cut processing time by ~20%.
- Automated data ingestion, transformation, and processing with Azure Data Factory, Azure SQL Database, and Blob Storage for analytics and stakeholder reporting.
- Developed Power BI reports and dashboards for Microsoft product teams, tracking revenue, usage, and other product KPIs to give business stakeholders a self-serve view of performance.
- Built monitoring dashboards and implemented Spark-based data validation and transformation, improving visibility into data-processing performance and data quality.
- Collaborated with engineering and business stakeholders to troubleshoot extraction and pipeline issues, test improvements, and strengthen reliability of recurring reporting workflows.

Software Engineer Intern | Reliance Industries Limited | Navi Mumbai, India — Jul 2020 – Aug 2020

- Built data visualizations and dashboards in Apache Superset and prepared technical documentation.

EDUCATION & CERTIFICATIONS

- **AWS Certified Data Engineer - Associate** | Amazon Web Services — Issued Oct 2024
- **Master of Applied Computing |** University of Windsor, Windsor, ON | GPA: 84.3% — Sep 2021 – Dec 2022
- **Bachelor of Engineering in Computer Engineering**
  Thapar Institute of Engineering and Technology, India | GPA: 8.96/10 — Jul 2017 – May 2021
  Relevant Coursework: Software Engineering, Database Management, Big Data Analytics, Cloud Computing, Data Structures & Algorithms
